Skills

Languages: JavaScript, TypeScript, Java, Python, C/C++, SQL, HTML, CSS

Technologies & Tools: React, React Native, Node JS, AWS, EC2, MongoDB, MySQL, Cassandra S3, Docker, Spring, Springboot, Angular

Work Experience

Full Stack Engineer | Muzify Inc., Bengaluru Jul 2024 - Jan 2026

- Built and optimized a high-traffic music analytics platform serving 100K+ monthly users, focusing on performant React components, state management, and UI responsiveness, with supporting Node.js APIs and data modeling.
- Drove cost optimization initiatives across backend services, achieving 50%($3k/m) AWS cost reduction through database query optimization and infrastructure tuning as well as integrated payment infrastructure using Stripe APIs, enabling monetization across multiple client platforms(web and mobile).
- React, React Native, Typescript, Node JS, AWS, EC2, S3, MySQL, MongoDB, Redis, Github Workflow

Full Stack Engineer | Homesome, San Francisco, CA Sept 2021 - Aug 2022

- Enabled approximately 25 underrepresented local grocery stores to onboard onto a digital commerce platform, enhancing online ordering access and developed customer-store communication features, including chat workflows, to improve engagement and order clarity.
- Angular, Javascript, Node JS, AWS Lambda, AWS S3

Member of Technical Staff - II | Verizon India, Chennai Nov 2017 - Jul 2019

- Developed a rule-based automation tool to convert Weblogic applications to Wildfly, reducing server maintenance costs.
- Collaborated with cross-functional teams to remodel critical customer-facing systems in Cassandra, cutting SLAs by approximately 50% and worked on Spring Boot microservices transformation, enhancing scalability and accelerating release cycles.
- Java, Springboot, Cassandra, Oracle

Software Engineer | Verizon India, Chennai Jul 2016 - Nov 2017

- Developed a comprehensive dashboard to visualize average response times for critical client systems and streamlined monitoring processes by eliminating hourly bulk email reports.
- Java, Springboot, Oracle, Javascript, d3

Software Development Intern | Mebelkart, Bengaluru May 2015 - Jul 2015

- Designed user interfaces to enhance customer experience and streamline navigation and designed APIs for android application for a furniture marketplace.
- Java, Android, PHP, Android Studio

Education

National Institute of Technology, Rourkela Jul 2012 - May 2016
B.Tech. in Computer Science and Engineering ***CGPA: 8.5/10***
Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems

Pennylvania State University Aug 2019 - May 2021
Relevant Coursework: Algorithm Analysis and Design, Operating Systems, Pattern Recognition and Machine Learning

Project Work

- **Multiplayer Wordle:** Developed a multi player (1v1) version of Wordle game(client-server) with real time web socket event based backend. Stack: React, Socket IO, Node JS, Express
- **Neptune:** Developed an offline cross-platform desktop application that helps manage side projects along with markdown and drawing board support. Stack: ElectronJS, React, Typescript, Tailwind
- **Augmented Reality Viewer:** Developed an AR viewer that displays artificial objects overlaid on images of a real 3D scene using point cloud generated by COLMAP. Stack: MATLAB, COLMAP
- **Create Project Skeleton:** Built a NPM library that helps scaffold empty react/typescript projects and other templates. No need to delete extra stuff. Stack: Node, NPM
